

RAIN DEFLECTOR

The Rain Deflector unique dual motor configuration with power management micro processors delivers a powerful, highly effective rain deflector in a compact, light-weight design.

Features

- Two removable 6.5 x 6.5 and 4 x 5.6 (optional) filter stages.
- Wireless Remote On/Off
- 3D printed and aluminum construction.
- 19mm & 15 mm rod mounting brackets.
- The power management electronics supply a constant current to the motors regardless the voltage (with in its voltage range).
 - That means the speed of the Zero stays constant as the voltage drops or fluctuations due to line loss or battery losing charge.
 - It also means no more center dot due to the glass slowing down.
- Compatible Lenses
 - All lenses from a small prime to Optimo 12-1 Zoom.
 - Max 162 mm diameter.

Specifications

- Rotation speed: 4500 rpm
- Light Weight only 2.7 kg.
- Mounts to 19mm, 15 mm rods.
- Panavision Mounting bracket available.
- Power Requirements
- 22-34 VDC
- 3 Amps Running
- 10 Amps Start up
- Dimensions
- 12" x 12" x 4"
