

Vehicle designed to capture moving scenes in locations inaccessible or off road (tracks, mountain, beach, etc ...). Both the front and back, is prepared with platform high strength aluminum, to work with 48.3 mm tubular structure. Also has wheel arch protectors. We have a caterpillar to work in extreme snow and mud. Very handy for various uses: from working with steadicam operators, as well as to work freehand with various remote heads.

## QUAD

### ENGINE

4-stroke single cylinder. 500c.c.

### DRIVE

4x6 / 6x6

### MAXIMUM SPEED

70 km/h

## DIMENSIONS

**Lenght** 2,25m

**Width** 1,10m

**Height** 1,15m

**Wheelbase** 1,65m
