

U-CRANE DYNAMIC

The U-Crane Dynamic is a new generation of our gyrostabilized robotic camera crane systems. It is remotely operated gyrostabilized technology that was designed for use on camera cars, electric carts, process trailers or other tracking vehicles to be able perform on narrow roads, small sized sets, tunnels, parking garages, bridges.

U-Crane Dynamic is lightweight and compact but powerful enough to go high speed and work in most challenging conditions. It is capable of 360° pan, tilting up and down allowing a wide range of impressively stable, smooth and very dynamic shots. U-Crane Dynamic system is operated via joystick consoles from within a camera car.
