

U-CRANE 6

The U-Crane 6 is a stabilized camera crane system that can be mounted on the roof of a camera car or a specialized vehicle which ensures that 360° pan movements can be made while you can also lift up and down.

The U-Crane is designed so that the filmmakers can follow moving vehicles from almost any angle and at the same time ensures stable images, accurate and of course crazy tracking shots. The arm is remote controlled and fully controllable from inside the camera car. The shots can be decided on the spot and quickly adjusted.

SPEC SHEET

SPECS

Arm length	4,5 – 7,8 m
Lens height	6.6m
Tilt	45°
Pan	360°
Max rotations	+- 3 rotations
Pan speed max	4,5 sec/360 °
Tilt speed max	1,5 sec/45°
Max payload	80Kg-120Kg
Max.speed	120km/h

U-CRANE 6

Incl 12vPower + bnc video for wireless teradek

FLIGHTHEAD 6s, incl:

Zoom motor
Spare zoom motor
Shake generator
Joystick control
Wheels control
