

Flight Head FALCON

La Flight Head Falcon de 3 eixos, es un innovador capçal remot ultralleuger, compacte i durador, que permet obtenir imatges dinàmiques molt estables. Es pot muntar en una varietat de plataformes, incloses grues regulars o telescòpiques, plataformes, sistemes de seguiment, càmera cars, vaixells, cable cams i towercams. Falcon ofereix un rendiment de confiança, un control sensible i precís, així com un funcionament altament eficient.
