

FLIGHT HEAD APEX

Three axis Flight Head Apex is engineered for superior filming performance and is one of the most compact, highly versatile and effective stabilized remote heads on the market. Apex offers smooth and responsive control eliminating camera shakes and vibration during fast and rough moves. Its open architecture and user-friendly design make it the remote head of choice for a wide range of tracking shots. Works on all types of camera cranes, arms, dollies, high speed tracking systems, camera cars, cable cams, etc.
