

## **BUGGY** EV

Load capacity and higher drag

Vehicle designed for capturing moving scenes in locations where we need a quiet work atmosphere that respects the environment.

It is ideal for working in interiors (recording studios, sports ...) and in public areas where it is not possible to set a vehicle with a combustion engine.

Both the front and the back, ready platforms with aluminum (alloy 7075 TT6) to work with 48.3 mm tubular structure.

Very handy: Steadicam operators, Hand held, various remote heads...
