

car shooting 111

FORD F-250 XLT Super Duty

Large load capacity and higher drag

Tracking vehicle with low front and rear platforms outfitted with 48mm speed-rail pipe with quick-release fittings.

Platforms can quickly be installed both on front and rear for any kind of shots made hand held or through leveling bases or camera mounts of any type.

The self-correcting height-adjustable air suspension gives you chatter-free running shots every time.

Its sequential automatic transmission delivers power smoothly from start to stop with no sudden movements or changes of pace typical from manual transmission vehicles.
