

## **QUAD** 6x6

The most versatile All terrain mini vehicle

Vehicle designed to capture moving scenes in inaccessible locations or off road shootings (trail tracks, mountain, beach, etc ...)

Both the front and back are outfitted with high strength aluminum platforms (TT6 7075) to work with 48 mm tubular structure.

An optional caterpillar to move over extreme snow or mud is available.

The 6x6 Quad becomes very handy working with steadycam or with many kinds of remote heads.
